Smart Belay X

	85 CM
blue 300	
Weight	1400g

Certified according to EN 17109 (class D)! The Smart Belay X is a redesign of our legendary Smart Belay - now with innovative magnetic technology for continuous safety and maximum freedom of movement in your high ropes course. Certified according to EN 17109 (class D).
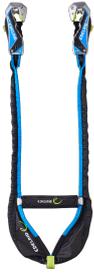

Features

- Quick registration and effective management thanks to RFID technology
- communicating, interconnected pulley carabiners prevent accidental detachment from the safety cable
- safety lock with magnet technology for maximum security and protection against careless use
- intuitive operation even for children
- steel pulleys integrated in the carabiner for use on zip lines replace the double pulley
- PILOT BAR minimizes the risk of strangulation and provides support for difficult elements in the course
- modular system allows the use of different connectors and different lengths of tie-in loops
- quick and easy evacuation made possible by opener or steel carabiner (not included in delivery)
- SBX HOLSTER included

oasis 138	
Weight	65g

Openable ring in accordance with EN 362-M for permanently connecting load-bearing equipment elements in any direction. The CUPID is designed with a single screw and no additional individual parts. The screw is never loaded along its axis and the ring remains closed under load even if the screw is lost. The opening width of 12 mm makes installing rope terminations, slings, and metal components easy.

Features

- Opening width: 12 mm
- Inside diameter: 44 mm

Technical information

- **Certification** EN 362
- **Material** Aluminium
- **Gate opening** 12 mm
- **Minimum breaking strength** 20 kN

Cupid Swivel

	000
night-oasis 219	
Weight	105g

With no unnecessary loose parts that can get lost, the ability to be opened and closed as often as users desire, and a design that makes it the lightest and most compact swivel in its class, the CUPID SWIVEL is a dream come true for any PPE system! The innovative integrated mechanical screw locking system enables the device to be repeatedly opened and closed without having to replace or manually secure screws, and reliably prevents the screw from opening of its own accord due to vibrations. The combination of a 12 mm opening width and the outward opening direction of the gate makes it easy to install rope terminals, slings, and metal components.

Features

- Small, ball-bearing-mounted swivel rotates reliably even under high loads
- Size: 95 x 50 x 28 mm
- Inside diameter: 25 mm
- Opening width: 12 mm

Technical information

- **Certification** PPE-R/11.135
- **Material** Aluminium
- **Minimum breaking strength** 20 kN

Switch Pro Y-Static

	95 CM	110 CM
red 200		
Weight	500g	530g

Y-lanyard for self-belaying and positioning, e.g. on high ropes courses. The asymmetric arms made of STATIC LOW STRETCH rope permit variable, situation-dependent use. Includes pre-assembled DSG 4000 STEEL carabiner on the longer arm.

Features

- Thermo Shield treatment for pleasant handling
- Please note: must not be used as a via ferrata set
- Transparent stitching protection for easier inspection
- Highly robust kernmantle construction
- Two independent arms allow different positioning
- Is attached to the harness by means of a cow hitch

MADE IN GERMANY

SMART BELAY X
ULTIMATE SAFETY FOR HIGH-ROPE COURSES

The Smart Belay X is a redesign of our legendary Smart Belay – now with innovative magnetic technology for continuous safety and maximum freedom of movement in your high ropes course.

The heart of the Smart Belay X are the communicating, interconnected pulley carabiners. If one of the carabiners is opened, the opening mechanism of the other carabiner is automatically blocked. A new feature is the magnetic locking mechanism.

This turns the Smart Belay X into a safety system according to EN 17109 Category D. The opening mechanism of the Smart Belay X is only released by an integrated magnet after contact with the steel cable. Unintentionally unhooking of the system is not possible when used correctly. The advantage: more safety for the visitors, less risk for the operator.

Like its predecessor, the new Smart Belay X can be easily installed in all existing adventure parks without the need for costly modifications.

Even moving or vertical sections can be implemented without a problem and thanks to the modular system it can be adapted to all common safety cable heights. This allows the operator the greatest possible flexibility in the selection of exciting climbing elements for a creative park design.
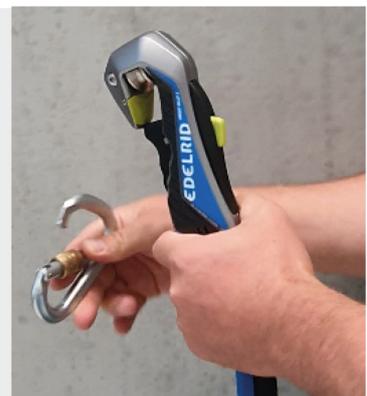

The Smart Belay X allows the customer to climb on his/her own and due to its outstanding geometry and intuitive handling, it is also easy for children to use. Overtaking is also possible without any problems, thus avoiding annoying bottlenecks with long waiting times.

A further advantage is the steel pulley integrated in the carabiners. They are designed for use on zip lines and replace the double pulley. The integrated Pilot Bar minimizes the risk of strangulation and provides control and hold support for zip lines or difficult elements in the course.

An integrated RFID transponder (UHF) enables fast registration and effective management — an invaluable advantage not only in the rental business. For example, it is possible to monitor application cycles and/or the PPE status of the product. This saves both time and money as well as increasing safety in the rental business.

HOW TO OPEN THE SMART BELAY X

Our new SMART BELAY X can be handled without our special opener SMART BELAY X OPENER tool by using a big HMS screw steel carabiner.

	VARIO
night-oasis 219	
Weight	1076g

Classic webbing harness for use on high rope courses. The different colors of the shoulder, hip and leg straps make the harness intuitive to put on and enable trainers to check it quickly and reliably. The six Slide Block buckles and pull-on loops at the end of the webbing material enable the harness to be simply adjusted for an optimum fit. The labeling field and integrated RFID transponder can be used to personalize the harness and make it far easier to document its use.

Features

- Stitched webbing terminations designed so that straps cannot be completely unthreaded
- Central D-ring for attaching a lanyard
- Integrated RFID transponder
- Adjustable back plate and elasticated bum straps (replaceable)
- Abrasion-resistant polyester straps with indicator threads
- Color-coded differentiation of the harness parts

	VARIO
night-oasis 219	
Weight	1350g

Easily adjustable and versatile full body harness for use on high rope courses. The different colors of the shoulder, hip and leg straps make the harness intuitive to put on and enable trainers to check it quickly and reliably. The eight Slide Block buckles enable the fit of the harness to be optimally adjusted for a wide range of user heights and sizes. Thanks to the dorsal eyelet certified to EN 361, the RADIALIS AIR offers an additional attachment point, for example for use with pamper pole elements. The labeling field and integrated RFID transponder can be used to personalize the harness and make it far easier to document its use.

Features

- Stitched webbing terminations designed so that straps cannot be completely unthreaded
- Central D-ring for attaching a lanyard
- Integrated RFID transponder
- Abrasion-resistant polyester straps with indicator threads
- Color-coded differentiation of the harness parts
- Additional, dorsal eyelet for use with pamper pole elements

Fraggle III

	XXS	XS
icemint 329		
Weight	271g	307g

With this padded full body harness even young climbers and little mountaineers weighing up to 40 kg can enjoy a scramble. The stiff construction with the fixed leg loops makes putting the harness on much easier, and thanks to the two Slide Block buckles, the harness is quickly adjusted to the right size. The two large tie-in loops offer enough space for two carabiners clipped in opposite directions (e.g. for top-roping). What makes the FRAGGLE truly special is that as the child gets bigger, the tie-in point moves and the harness "grows" as well. Besides, the FRAGGLE is fully manufactured in compliance with the strict bluesign® system requirements, in order to protect the environment, and resources.

Features

- 3D mesh padding and soft webbing edges offer optimum comfort
- Two Slide Block buckles for quick and easy harness adjustment
- Attachment point at the back for extra safety in steep terrain or while skiing
- Made of bluesign®-certified materials
- "Growing" construction for an optimal and secure fit
- The padding ensures that the harness is dimensionally stable and can therefore be put on and taken off particularly easily—even by the child itself
- Delivered in a useful sports bag

Technical information
